

SOFT INTELLIGENCE
RETAIL SOLUTIONS WITH A PERSONAL TOUCH

Physical Count made easier with **SOFT INTELLIGENCE SmartCount** simplifying the task of conducting a physical count

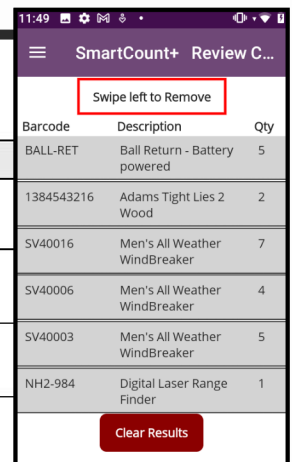

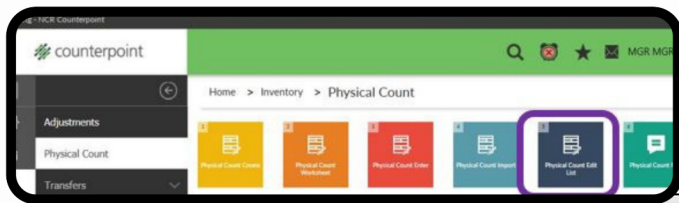

The **SOFT INTELLIGENCE** direct API integration to Counterpoint SQL reduces back office labor time by providing accurate counts in real time. Eliminate the time consuming tasks of downloading or uploading data files from your non-integrated scanner device. **SmartCount** intuitive user-interface includes built-in support for gridded and serialized items as well as alternate units.

***SmartCount** works on any device running Android 5 or later, with 1GB+ of memory and 250 MB+ of available storage.

SmartCount features include:

- Verifies that the scanned barcode is on file in the Counterpoint database
- Directly updates Counterpoint Physical Count transactions
- Automatically creates physical count transactions for valid barcodes that are scanned but were not included in the physical count freeze.
- Prompts to scan barcodes for sometimes serialized items
- Allows manual entry of serial numbers for Sometimes and Always Serialized items
- Review counts scanned on the device

Location	MAIN						Frozen quantity	Qty counted
